Description

The XS2 is a very popular wheelchair which has recently been improved and is packed full of useful features making it an ideal choice for anyone who requires a wheelchair.

This wheelchair has a sturdy, silver aluminium frame with a simple folding mechanism ensuring this wheelchair is not only lightweight and durable when in use, but it also folds down simply allowing storage or transportation when not in use. Featuring a half folding backrest, removable arms and adjustable footrests this wheelchair can be made really compact if required.

The XS2 Transit model also has features to help the attendant including rear stepper tubes with integrated anti-tip wheels to help raise the front of the chair when attempting kerbs and long reach cable brakes featuring "immediate access" allowing the attendant to reduce speed whilst moving.
